

Hello,

This letter is in regards to the job advertisement posted by your organization for the application developer position. I would like to bring to your attention that I am interested in this job and am seeking employment for this position.

I have experience in both front-end and back-end programming. Through training in two cohorts at the Iron Yard in Charleston, and my own efforts with online courses on Treehouse and Udemy, I have learned JavaScript, HTML/CSS on the front-end, and Java, Node.js on the back-end.. What skills that are required in this position that I do not currently have I can gain through hard-work and quick learning in order to be a valuable asset. It would be great if we could meet for an interview.

Regards,

Alex Lamm
