Qualifications Summary

Creatively minded, budding full-stack software developer. Gained team-working/building skills through previous work/internship and programming bootcamp experience. Worked on and completed dozens of projects through courses and on my own efforts (many more to come), including a marine debris tracking app. On a journey to become a programming Swiss-army knife that can use whatever tool (language, library, etc.) is necessary to accomplish a project.

Skills

Front-end Programming
JavaScript
HTML/CSS

Back-end Programming
Java
Node
postgresSQL
MS SQL
